Frontend Developer

GO Retrieve

May 2018 – Dec 2018 (8 months)

I worked as frontend developer at GO Retrieve company. I developed fitness site for this company. It has functionality of appointments, booking and making funnels by UI drag and drop. I mainly did UI drag and drop to make funnels as figma. It was difficult part, because it has many functionalities. I had to make UI by dragging and dropping elements, changing properties of each elements(appearance), adding mouse clicking custom events to each element as customers want. I solved this problem perfectly and client loved it, I also got good feedback. It was pleasure working in this company.

Vue.js · Drag and Drop Elements · Optimizing Performance
Data Structures · MySQL · PHP

Full Stack Engineer

Perfume Parlour

Mar 2016 – Mar 2017 (1 year 1 month)

I worked as Full-stack developer in perfume parlour company for 1 year. While working in this company, I developed perfume-parlour.co.uk site using Laravel framework. I developed all features of this site as other e-commerce sites including mailing, checkout page, cart page and payment page. I used Laravel stripe-php package for payment and laravel-dompdf to make invoices. I focused on security part of this site as it touches payments, so I used csrf tokens, permission check, IP check, email confirmation and encrypting database fields.

Email Management · Stripe Connect · PDF Creator
MySQL · Laravel · Bootstrap
